1. Acknowledgment is made of applicant's claim for foreign priority based on an application filed in Japan on 7/16/2001. It is noted, however, that applicant has not filed a certified copy of the Japanese application as required by 35 U.S.C. 119(b).
2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over O'Boyle 6,328,209 in view of Deason et al 5,003,600. O'Boyle discloses an identity card with a holographic image (col 5 lines 50-60) which creates a moiré pattern (col 12 lines 35-55). O'Boyle does not specifically disclose the three dimensional nature of the image creating the moiré pattern. Deason discloses a surface relief diffraction grating, i.e. three dimensional (col 2 line 65), which creates a moiré pattern (col 4 lines 18-28), on an ID tag (col 4 line 38-46). The diffraction grating is composed of an inert epoxy, i.e. resin (col 4 lines 47-56). It would have been obvious to a person of ordinary skill in the art at the time of the invention to make the image of O'Boyle three dimensional in order to allow for pre-manufacture of the image to be placed on a card.
